

CP_II - Blatt 2

Julia Els, 454291 - Felix Krueckel, 454343

16. April 2025

Aufgabe 2)

Die Kovarianzmatrix ist:

$$V(x) = \begin{pmatrix} \sigma_x^2 & \sigma_{xy} \\ \sigma_{yx} & \sigma_y^2 \end{pmatrix}$$

$$\sigma_{xy} = \rho\sigma_x\sigma_y = 0.6$$

$$\sigma_{yx} = \rho\sigma_x\sigma_y = 0.6$$

$$V(x) = \begin{pmatrix} 1 & 0.6 \\ 0.6 & 1 \end{pmatrix}$$
